

The **Centre for e-Research at King's College London** is seeking to appoint a **research fellow to work on a pioneering project to measure the impact of texts over time**

. The successful candidate should specialise in the areas of text- and data mining, natural language processing, semantic web technologies, and database analysis and design. The postholder will spend two thirds of his or her time on leading the technical research and development work of the ImpactTracer project funded by the European Research Council in close liaison with the Principal Investigator of the project, Professor Christoph Meyer, and a research associate. The project aims to develop the proto-type of a web-application capable of measuring and visualising the impact of texts over time on other texts.

The post will be based at the College's Strand campus in the Drury Lane Building where the Centre for e-Research is located. Established in 2008, the Centre for e-Research (CeRch) is a research centre located in the Department of Digital Humanities in the School of Arts and Humanities, aimed at facilitating interdisciplinary, institutional, national and international collaboration. It works collaboratively with researchers, research teams and groups, and has partners in research projects across King's College London.

The post is available from **1 June 2012 and is fixed until 30 April 2013**. The closing date for applications is **28 May 2012**.

Equality of opportunity is College policy

Further details and application packs are available on the College's website at www.kcl.ac.uk/jobs. All

correspondence should clearly state the job title and reference number G7/AAH/391/12-JM.
