

[Oxford University Computing Services](#) manage and maintain the IT infrastructure needed to support research at a world class University. Key services at OUCS include:

- the Oxford Text Archive,
- the Text Encoding Initiative,
- the British National Corpus,
- the OSSWatch Advisory Service, and
- the Intute Arts and Humanities gateway.

OUCS has a long history of participation in digital applications in the Humanities, with particular expertise in:

- digital project management,
- text encoding,
- metadata standards,
- electronic editing and publishing technologies, and
- corpus linguistics.

### **Role in the Preparing DARIAH project**

The Oxford University Computing Services participate in the dissemination work package. They will act as the liaison between DARIAH and [CLARIN](#), ensuring a smooth flow of communications between the two projects, and will provide links with other key areas of linguistic, literary and textual scholarship.
