The Digital Resources and Imaging Services of the library at Trinity College Dublin has advertised a posting for a Programmer/Analyst.

The programmer/analyst will be a key member of the libraries digitisation team, and will provide support and leadership with the planning, development and implementation of the technical infrastructure of the Trinity College Digital Library Collections Repository. This position will provide programming and technical expertise to support the ongoing development of an open source Fedora Commons-based Digital Library Repository (http://fedora-commons.org ** Not to be confused with the Linux Operating System) designed to provide new electronic access to the rare and unique Trinity College Library Special Collections and Library Research Resources, whilst ensuring the long term preservation of these unique and valuable digital resources and assets.

The Digital Library Collections Repository can be viewed at http://digitalcollections.tcd.ie

Applications are due by the 20 July 2012. More information and particulars can be found at: http://Jobs.tcd.ie in the Library Department section.
