VCC3 in a nutshell
"To expose and share scholarly content"

Sophie David (TGE Adonis, CNRS)
Laurents Sesink (DANS)

28th November 2012

VCC3 organisation

1. VCC Chair and VCC co-heads

- Data Archiving and Networked Services (DANS) - The Netherlands
  - Laurents Sesink
- TGE Adonis - France
  - Sophie David

2. 6 tasks and their task leaders

1. Coordination and Management - Sophie David and Laurents Sesink (FR/NL)
2. Curation - Laurents Sesink (NL)
3. Best practices and open access - Sandra Collins (IE)
4. Reference Data Registries - Daniel Kurzawe (DE)
5. Enrich digital scholar content - Maarten Hoogerwerf (NL)
6. Dissemination and digital publishing - Marin Dacos and Pierre Mounier (FR)

3. Contact points

- Karl-Heinz Mörth (AT)
- Ulrich Schwardmann (DE)
- Rimvydas Lauzikas (LT)

VCC3 organisation

1. **Face to Face Meetings**

2. **Telephone conferences**

3. **Coordination and Management**
   - General objective
   - Specific objectives

Two working approaches:
1) Types of offers and involvement

1. **To specify the types of offers and involvement of a partner**
   - Access
   - Expertise
   - Hosting : content hosting, interoperability, software, dissemination

2. **Requirements for each type**
   - Standards, availability of the service, conditions of use and reuse, etc.

Working approach:
1) Types of offers and involvement

T1: Specifying the overlap between offers and VCC3 tasks

	Curation	Best practices and open access	Reference data registries	Enrich digital scholar content	Dissemination and digital publishing
Access	X		X	X	
Expertise	X	X	X		X
Hosting	X	X			X

Working approach: types of offers

T2: Specifying the partner's offers (for example TGE Adonis)

	Curation	Best practices and open access	Reference data registries	Enrich digital scholar content	Dissemination and digital publishing
Access				ISIDORE (visibility)	
Expertise		RDF - SKOS		ISIDORE (design)	
Hosting	WEBACTORS – STORAGE - INFRATECH			ISIDORE (RDF triplestore and harvesting)	

T3: Specifying country offers (for example France)

	Curation	Best practices and open access	Reference data registries	Enrich digital scholar content	Dissemination and digital publishing
Access	ATILF		ABES	TGE Adonis	CCSD - CLEO
Expertise	ATILF - LPL	ATILF – CCSD – CLEO - TGE ADONIS	ABES	TGE Adonis	CCSD - CLEO
Hosting	TGE Adonis		ABES	TGE Adonis	CCSD - CLEO

Working approach: types of offers

T4. Specifying all the country offers

	Curation	Best practices and open access	Reference data registries	Enrich digital scholar content	Dissemination and digital publishing
Access	Country A		Country B	Country D	
Expertise			Country A Country C		Country A
Hosting	Country G	Country E	Country B		Country F

Two working approaches:
2) Research life cycle

1. **To link each activity to one stage of the research life cycle**
   1. Search and discovery
   2. Gather
   3. Analyse and experiment
   4. Publish and disseminate
   5. Store and archive
2. **An example: the task "curation"**
   1. Activity A : to develop data management profiles for disciplines.
      1. Stakeholders: researchers
      2. Needs: to look for advice on instruments for data management, in his particular discipline.
      3. "Analyse and experiment".
   2. Activity B: to build a library of various guidelines about storage and archiving
      1. Stakeholders: Researchers
      2. Needs: to look for advice on requirements and workflow for storage and archiving.
      3. "Store and archive"

As a result for the DOP

1. **Each task description has 3 parts:**
   - Definition
   - 2 or more use cases
   - Table of activities

2. **Categories for the Table of activities**
   - Stakeholder
   - Need of the stakeholder
   - Type of offers
   - Stage of the research life cycle
   - Other VCCs to be connected
   - Description of the activity
   - Deliverable(s)
   - European projects which could be connected (still to be completed)

3. **The table as "a story"**

   Given the needs N of the stakeholders S, the activity A consists in B. This activity is related to "Analyse and Experiment", relies on an offer of Hosting, produces deliverables D, is linked to the European project P, and is worked out with VCC1.

What's next?

Amongst other things…

1. To circulate the VCC3 DOP to contact points and VCC3 members

2. To establish priorities in the activities, to establish a calendar

Thank you!
