The **Department of Digital Humanities (DDH), King's College London** is looking for a highly
motivated and technically sophisticated individual to work as a
**developer on the research project "Digital Resource and Database of Palaeography,
Manuscripts and Diplomatic" (DigiPal**
 http://www.digipal.eu/
)
. The position will involve designing and developing computer tools and methods to facilitate
digital scholarship in the study of medieval and ancient handwriting and documents.

DDH is an international leader in the application of technology in research in the arts and
humanities, and in the social sciences. It is in the School of Arts and Humanities and
undertakes research on a collaborative basis across discipline, institutional and national
boundaries: it has collaborative relationships across King's College and with a large number of
institutions and bodies in the UK and internationally. DDH has 13 established staff and 16
research staff working on research projects. It has generated over £17 million in research grants
over the past 7 years and is involved in more than 30 major research projects, with funding from
the Arts and Humanities Research Council (AHRC), the Leverhulme Trust and the Andrew W
Mellon Foundation. DDH is responsible for the MA programmes in Digital Culture and Society,
and Digital Humanities; it also runs undergraduate Digital Humanities modules.

Submission date is 10th of June 2012.
